

TABLE OF CONTENTS

ABSTRACT	III
EXECUTIVE SUMMARY	IV
SECTION I: WORKSHOP HISTORY	1
SECTION II: WORKSHOP PRESENTATIONS	3
PHYSICAL AND BIOLOGICAL CONSIDERATIONS	3
Oceanography, waves, and mechanical damage <i>by Scott Heron</i>	3
Vulnerability of coral reefs in a changing climate <i>by Ove Hoegh-Guldberg</i>	4
The zooxanthellae story <i>by Ray Berkelmans</i>	8
Monitoring the biological state of coral reefs <i>by Hugh Sweatman</i>	9
Coral vulnerability and resilience <i>by Roberto Prieto-Iglesias</i>	11
Modeling bleaching, climate change, and coral vulnerability <i>by Sophie Dove</i>	12
Water quality and coral bleaching thresholds <i>by Scott Wooldridge</i>	14
<i>In situ</i> monitoring of environmental coral stress <i>by Al Strong</i>	15
TECHNICAL CONSIDERATIONS	17
Satellites and remote sensing <i>by William Skirving</i>	17
Remote sensing coral reef environmental stress <i>by Mark Eakin</i>	17
Thermal stress links with coral bleaching and infectious diseases <i>by Scott Heron</i>	20
Combining heat stress and light to produce a new bleaching product <i>by William Skirving</i>	21
Monitoring coral surface UV & visible solar radiation from space <i>by Kelvin Michael</i>	22
Water quality <i>by Arnold Dekker</i>	23
Ocean colour over coral reefs <i>by Scarla Weeks</i>	29
Utility of seagrasses for satellite monitoring of coral reef condition <i>by Susana Enriquez</i>	31
The future of ocean colour products on coral reefs <i>by Peter Fearn</i>	33
Use of climate models to predict coral reef vulnerability <i>by Claire Spillman</i>	35
Integrating remote sensing data into ecosystem models <i>by Mark Eakin</i>	37
Machine learning and data mining <i>by Vic Ciesielski</i>	41
Web-based delivery of NOAA Coral Reef Watch products <i>by Gang Liu</i>	44
Delivering tools and products to managers through trainings and workshops <i>by Britt Parker</i>	47
Information sharing, integration and quality control for coral reef datasets <i>by Jane Hunter</i>	49
MANAGEMENT CONSIDERATIONS	52
Managing Coral Reefs 101 <i>by Randy Kosaki</i>	52
Managing coral reefs in a changing climate <i>by Billy Causey</i>	53
U.S. coral reef managers' requests for remote sensing products <i>by Jessica Morgan</i>	56
Use of coral stress monitoring for management <i>by Billy Causey</i>	59
Key environmental variables for management <i>by Randy Kosaki</i>	61
Aspects other than those directly related to corals <i>by Billy Causey</i>	63

SECTION III: WORKSHOP DISCUSSIONS.....	66
“Brainstorming for ideas for new remote sensing products”.....	66
“Integrating in situ monitoring with remote sensing to provide tools for management”	67
“How can the use of remote sensing in models improve management of coral reefs?”	69
“Improving links between science and management”.....	70
“Use of water quality and light over coral reefs for future management products”.....	72
“What novel uses of any environmental variables can assist management of coral reefs?”	74
“Is there too much emphasis placed on corals and coral health?”	76
“From the management perspective, what are examples of good product delivery?”	77
“What issues are managers having to respond to?”	79
“What other variables, tools, and information would be useful for managing coral reefs?”.....	80
SECTION IV: SUMMARY AND FUTURE DIRECTIONS.....	83
APPENDIX A: LAMINGTON WORKSHOP AGENDA.....	A1
APPENDIX B: PARTICIPANT LIST	B1
APPENDIX C: DISCUSSION BOARD NOTES	C1
APPENDIX D: WORKS CITED.....	D1
APPENDIX E: ACRONYMS AND ABBREVIATIONS	E1
