

CoRIS Place Keyword Thesaurus by Ocean - 1/30/2013

Pacific Ocean / Great Barrier Reef

This keyword list contains Pacific Ocean Great Barrier Reef place names of coral reefs, islands, bays and other geographic features in a hierarchical structure. For example, the first name on the list - Abington Reef - is in the Coral Sea, which is part of the Pacific Ocean. The leading label - OCEAN BASIN - indicates this list is organized according to ocean, sea, and geographic names rather than country place names. The list is sorted alphabetically. The same names are available from "Place Keywords by Country/Territory - Pacific Ocean / Great Barrier Reef" but sorted by country and territory name. Each place name is followed by a unique identifier enclosed in parentheses. The identifier is made up of the latitude and longitude in whole degrees of the place location, followed by a four digit number. The number is used to uniquely identify multiple places that are located at the same latitude and longitude. For example, the first place name "Abington Reef" has a unique identifier of "18S150E0001". From that we see that Bird Islet is located at 18 degrees south (S) and 150 degrees east (E). It is place number 0001 at that latitude and longitude. This is a reformatted version of a list that was obtained from ReefBase.
